WhatsApp AI Agent

Ready to serve customers on WhatsApp, 24/7?

A custom AI agent that answers questions, takes orders and hands off to your team inside the app your customers already use.

WHAT IS INCLUDED

- **Conversation Design**
  We map your top customer journeys, tone of voice and escalation rules before any code is written.
- **Agent Build**
  An AI agent connected to the WhatsApp Business API, trained on your products, prices and policies.
- **Business Integrations**
  Links to your catalogue, payments, CRM or spreadsheets so the agent can act, not only answer.
- **Human Handoff**
  Smooth transfer to your staff with full chat context when a customer needs a person.
- **Testing and Guardrails**
  Scenario testing in English and Pidgin, with safeguards against wrong or off-brand replies.
- **30-Day Support**
  Monitoring, fixes and tuning for 30 days after go-live.
