AI Workflow Automation Sprint

Which repetitive tasks could run themselves this month?

A focused two-week sprint that takes one slow, manual process and turns it into a reliable, AI-assisted automation.

WHAT IS INCLUDED

- **Process Mapping**
  We document the workflow end to end, find the bottlenecks and set a measurable target.
- **Automation Design**
  A clear blueprint of triggers, AI steps, checks and human approvals.
- **Build and Integrate**
  Working automation connected to your email, sheets, WhatsApp, accounting or internal tools.
- **Error Handling**
  Alerts, retries and review queues so problems surface instead of hiding.
- **Team Training**
  A short walkthrough and runbook so your staff can operate it confidently.
- **Impact Report**
  Time and cost savings measured against the baseline we set on day one.

WHO THIS IS FOR

- Finance and admin teams buried in manual entry
- Sales teams chasing leads and follow-ups by hand
- Operations managers reconciling data across tools
- Founders who want quick, visible wins from AI
- Businesses with one process that slows everything else
