AI-Powered MVP Build Sprint

Have an idea? Let's ship a working product.

A four-week sprint from validated idea to a live, production-ready first version, built by the engineer who ships SaaS products for a living.

WHAT IS INCLUDED

- **Scope and Architecture**
  We cut the idea to its smallest valuable version and design a stack that scales.
- **Backend and Data**
  Secure APIs and a relational database with authentication and clean data models.
- **Web or Mobile Interface**
  A fast, polished front end built for your target users and devices.
- **AI Features**
  LLM-powered features with sensible limits, cost controls and fallbacks.
- **Deployment**
  Hosting, environments, monitoring and a repeatable release process.
- **Handover**
  Full source code, documentation and a walkthrough, with the code owned by you.

WHO THIS IS FOR

- Founders with a validated idea and no technical partner
- Companies launching a new digital product
- Startups needing a first version before fundraising
- Teams replacing spreadsheets with real software
- Agencies needing an engineering partner

PRICING

STARTER SPRINT
₦2,500,000 | $1,925
Focused first version · core features, one platform

FULL BUILD
₦6,000,000 | $4,615
Richer products and integrations · multi-role app, payments, admin panel

USD pricing applies to international clients.

DELIVERY TIMELINE

Week 1	Scope, design and architecture
Week 2	Core backend and data
Week 3	Interface and AI features
Week 4	Testing, deployment, handover
Days 30+	Post-launch support

WHAT YOU WILL GET

- ✓ A live product real users can sign up for
- ✓ Source code and infrastructure you own
- ✓ A stack ready to scale with demand
- ✓ Documentation your next developer will thank you for
- ✓ A prioritised roadmap for version two

Start with an AI Readiness Assessment and its fee is fully offset against your build.
