LLM Reliability and Cost Audit

Is your AI feature accurate, safe and affordable at scale?

An engineering review of your live AI system that finds what fails, what costs too much and what to fix first.

WHAT IS INCLUDED

- **Architecture Review**
  A look at your prompts, models, retrieval and tool calls for weak points.
- **Failure Analysis**
  We trace real conversations to find hallucinations, loops and silent errors.
- **Cost and Latency Profile**
  Token spend and response times broken down by feature, with savings opportunities.
- **Evaluation Suite**
  A repeatable set of test cases so quality is measured and not guessed.
- **Observability Setup**
  Tracing and monitoring in place with ForgeObserver or your preferred stack.
- **Fix Roadmap**
  A ranked list of fixes with effort, impact and expected savings.

WHO THIS IS FOR

- Teams running an LLM feature in production
- Companies with rising API bills
- Products receiving user complaints about AI answers
- CTOs preparing for a security or quality review
- Founders about to scale usage

PRICING

STANDARD

₦400,000 | $310

One AI application · 1 system, up to 1,000 traces reviewed

ENTERPRISE

₦900,000 | $700

Multiple systems or teams · several applications, deeper review

USD pricing applies to international clients.

DELIVERY TIMELINE

Day 1	Access, briefing and goals
Days 2-4	Trace review and failure analysis
Days 5-6	Cost, latency and evaluation work
Day 7	Written report delivered
Days 8-9	Findings walkthrough call

AFTER THE AUDIT YOU WILL KNOW

- ✓ Where your AI fails and why
- ✓ What your AI really costs per user and per task
- ✓ A baseline quality score you can track
- ✓ Monitoring that catches problems early
- ✓ A prioritised fix list with expected savings

Need the fixes implemented? The audit fee is fully offset against the remediation work.
